5. Pesticides to be analysed	11

1. INTRODUCTION

Multiannual national control programme for pesticide residues (Monitoring) 2015-2017 has been established according to terms and conditions of Articles 26-35 of Regulation (EC) No 396/2005 of the European Parliament and the Council, of 23.02.2005.

The planned controls on pesticide residues, consisting of sampling and laboratory analysis, will be carried out in order to enforce compliance with Regulation (EC) No 396/2005 in accordance with the relevant provisions of EU law relating to official controls for food and feed.

The programme is risk-based and the distribution of the samples intends to ensure that the results are representative of the market. It aims at assessing consumer exposure in order to achieve a high level of protection and application of good agricultural practice in all stages of production and harvest of agricultural products.

The Community Control Programme according to Commission Regulation (EC) No 400/2014, of 22nd April 2014, concerning a Coordinated Multiannual Community Control Programme for the years 2015, 2016 and 2017 to ensure compliance with maximum levels of and to assess the consumer exposure to pesticide residues in and on food of plant and animal origin, have been incorporated in the multiannual national control programme for 2015-2017.

Updates of the multiannual national control programme for pesticide residues will be submitted annually.

Sampling strategy will be based on “from the farm to the fork” rationale, taking into account the specificities of each region of the country. The sampling methods, necessary for carrying out such controls of pesticide residues, will be those provided for in JMD 91972/2003 (Directive 2002/63/EC). Samples will be taken by domestic production and imports, proportionally, covering points of collection, storage, packing and trade of products of plant origin. For feed, sampling and analysis is carried out according to 152/2009/EC as amended by Reg. 691/2013 /EC.

The official laboratories, analysing samples for pesticide residues are accredited and participate in the Community Proficiency Tests. The methods of analysis used by the laboratories will fully comply with the criteria set out in relevant EU law provisions and other adopted technical guidelines.

Effective, proportionate and dissuasive sanctions, predicted in national legislation, will be imposed in any case of infringement of the provisions of Regulation (EC) No 396/2005.

The control programmes for pesticide residues and the report of results of the national residue monitoring are published on the official web site of the Hellenic Ministry of Rural Development and Food on an annual basis.

2. CRITERIA APPLIED IN DRAWING UP THE PROGRAMME

Based on a risk approach, the criteria and factors applied in drawing up the programme include:

- Number of samples (domestic and imported) for each product
- Agricultural produce
- Cultivation area per culture
- Expected imports
- Results from previous years' monitoring programmes
- Dietary intake contribution of each product
- Sampling location
- Pesticides used in practice by the farmers
- Community control programme
- Relevant RASFF notifications for pesticide residues
- Personnel and analytical capacity of the official laboratories

3. PRODUCTS OF PLANT AND ANIMAL ORIGIN TO BE SAMPLED

Based on the above mentioned criteria, the products of plant and animal origin to be sampled during 2015, 2016 and 2017 according to Regulation (EC) No 396/2005, are:

2015	2016	2017
apple	apple	apple
apricot	apricot	apricot
asparagus	asparagus	asparagus
aubergine (egg plant)	aubergine (egg plant)	aubergine (egg plant)
banana	banana	banana
bean (with pods)	bean (with pods)	bean (with pods)
broccoli	broccoli	broccoli
butter	cabbage	cabbage
cabbage	carrot	carrot
carrot	cauliflower	cauliflower
cauliflower	cherry	cherry
cherry	courgette	courgette
chestnut	cucumber	cucumber
courgette	grapefruit	grapefruit
cucumber	juice (various fruits)	cucumber
eggs (chicken)	kiwi	grape
fig	leek	kiwi
figs dried	lemon	leek
grapefruit	lettuce	lemon
honey	mandarin	lettuce
juice (orange)	meat	liver (bovine and other ruminants, swine and poultry)
kiwi	(swine muscle and fat)	mandarin
lemon	melon	meat (poultry muscle and fat)
lettuce	milk (cow's)	melon
mandarin	okra	okra
melon	olive oil	olive oil
nuts	onion	onion
okra	orange	
olive oil		

onion		orange
orange	peach/nectarine	peach/nectarine
peach/nectarine	pear	pear
pear	peas without pods (fresh/frozen)	peas without pod (fresh/frozen)
peas without pod (fresh/frozen)	pepper	pepper
pepper	plum	plum
plum	pomegranate	pomegranate
potato	potato	potato
pulses	pulses	pulses
quince	rice	spinach
rice	rye/oat or rye flour	rice
rocket-radish	spinach	strawberry
spinach	strawberry	table grapes
strawberry	table grapes	table olives
spices	table olives	tomato
table grapes	vine leaves	vine leaves
table olives	watermelon	watermelon
tea, herbs	wheat flour	wheat flour
tomato	wine	wine grapes
vine leaves	wine grapes	organic products of plant origin
watermelon	organic products of plant origin	baby food of plant origin
wheat	baby food of plant origin	feed of plant origin
whole grain flour	feed of plant origin	processed products
wine grapes	processed products	processed products
organic products of plant origin		
baby food of plant origin		
feed of plant origin		

4. NUMBER OF SAMPLES

The distribution of the number of samples per product is analysed on the following tables:

Year 2015

Product of plant/animal origin	Number of samples
apple	75
apricot	46
asparagus	20
aubergine (egg plant)	71
banana	37
bean (with pods)	42
broccoli	23
butter	15
cabbage	22
carrot	39
cauliflower	15
cherry	46
chestnut	6
courgette	62
cucumber	84
eggs (chicken)	15
fig	5
figs dried	5
grape fruit	7
honey	10
juice (orange)	15
kiwi	45
lemon	34
lettuce	72
mandarin	65
melon	47
nuts	5
okra	8
olive oil	70
onion	10
orange	64
parsley	5
peach/nectarine	76
pear	67
peas without pod (fresh/frozen)	45
pepper	111
plum	28
pomegranate	18

potato	72
pulses	10
quince	2
rice	15
rocket-radishes	14
spinach	55
strawberry	48
table grapes	83
table olives	15
tea-herbs-spices	5
tomato	85
vine leaves	13
watermelon	19
wheat	22
whole grain flour	20
wine grapes	37
organic products of plant origin	55
baby food of plant origin	20
feed of plant origin	10

Year 2016

Product of plant/animal origin	Number of samples
apple	80
apricot	45
asparagus	20
aubergine (eggplant)	55
banana	20
rye/oat (or rye flour)	15
bean (with pods)	40
broccoli	20
cabbage	35
carrot	35
cauliflower	10
cherry	45
courgette	65
cucumber	90
grapes (table and wine)	90
grapefruit	5
kiwi	45
leek	15
lemon	30
lettuce	70
mandarin	66

meat (swine muscle and fat)	15
melon	45
milk (cow's)	15
okra	10
olive oil	50
onion	10
orange	65
peach/nectarine	80
pear	70
peas without pods (fresh/frozen)	55
pepper	100
plum	25
pomegranate	10
potato	75
pulses	10
rice	20
spinach	55
strawberry	60
table olives	15
tomato	90
vine leaves	15
watermelon	18
wheat flour	15
organic products of plant origin	50
baby food of plant origin	20
feed of plant origin	10
wine	15
juice (various fruits)	15
other processed products	10

Year 2017

Product of plant/animal origin	Number of samples
apple	80
apricot	45
asparagus	20
aubergine (eggplant)	55
banana	25
bean (with pods)	45
broccoli	15
cabbage	20
carrot	40
cauliflower	15

cherry	45
courgette	60
cucumber	85
onion	10
grapes (table and wine)	90
kiwi	45
leek	15
lemon	30
lettuce	80
liver (bovine and other ruminants, swine and poultry)	15
meat (poultry muscle and fat)	15
melon	40
okra	8
olive oil	70
orange or mandarin	120
peach/nectarine	75
pear	70
peas without pod (fresh/frozen)	45
pepper	100
plum	15
potato	70
pulses	10
spinach	35
rice	25
strawberry	45
table olives	20
tomato	90
vine leaves	15
watermelon	18
wheat flour	15
other processed products	90
organic products of plant origin	50
baby food of plant origin	20
feed of plant origin	10

5. PESTICIDES TO BE ANALYSED

The pesticides to be analysed, depending on the product of plant origin and the laboratory that conducts the analysis, are included in the following tables. In addition, lower RLs are achieved for baby foods according to the relevant Regulations.

5.1. MRM for products of high water content:

Analyte	RL mg/kg	Analyte	RL mg/kg	Analyte	RL mg/kg
acrinathrin	0,02	dicloran	0,05	iprodione	0,05
alachlor	0,01	dieldrin (sum)	0,01	kresoxim-methyl	0,05
